

Multi-Operator Combiner for DAS Applications

Applications

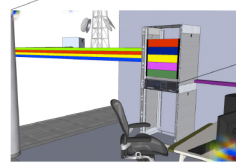

- Stadiums and arenas
- Healthcare and university campuses
- Subway and tunnel Systems
- Office Buildings

Carrier's signals cannot penetrate the buildings walls and signal is weak or non-existent.

Benefits

- Real-time remote power level control, monitoring and balancing
- Flexible wideband I/O for carrier agnostic operations
- Integrate RF distribution equipment
- Reduce cabling up to 94% versus legacy solutions
- Prevent carrier outages with seamless redundancy
- Speed installations and minimize maintenance

Quintech's **NEXUS-4** combines and routes and routes multi-carrier's signals to remote antennas

Product

Multi-Operator Combiner **NEXUS-4** - The **NEXUS-4** is a **keystone** component that integrates bi-directional splitters, combiners, attenuators, and switches into a compact 6 RU chassis that is ready-to-use in a DAS network.
